# About Us

## Nelux: Professional Lighting Solutions

At Nelux, we have been lighting up ideas and projects around the world for over 30 years. Since establishing our headquarters in Hong Kong in 2010, we have become a trusted partner in the design and supply of technical and decorative lighting solutions for hotels, restaurants, franchises, retail stores, museums, and other commercial spaces.

Our philosophy blends innovation, design, and functionality to deliver high-performance products that not only meet but exceed the expectations of our clients. We focus on two key areas:

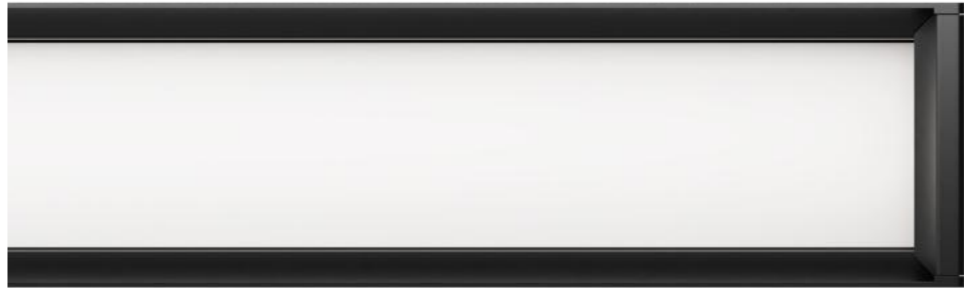

A premium range of interior lighting with a 5-year warranty, perfect for projects requiring durability and aesthetic excellence.

A bespoke production service that allows for the creation of unique pieces tailored to the specific needs of each client and project.

Our global market expertise, combined with an unwavering commitment to quality and competitive pricing, positions us as a leader in lighting solutions for large-scale projects. This catalog is a testament to our dedication and passion for illuminating every space with creativity and precision.

# Intelligent induction

## CCT setting

You can set the color temperature with a simple gesture. From 3000K warm tone to 6000K cold tone.

## Dimmable 5%-100%

You can set the color temperature with a simple gesture. From 3000K warm tone to 6000K cold tone.

## Light sensing dimmable

It provides double-sided light output through its two LED rings, and the upper and lower lights can operate independently of each other.

Suspended

You can easily slide your hand through the light sensor to switch functions without contact, match different space scenes, and adjust the brightness and color temperature synchronously.

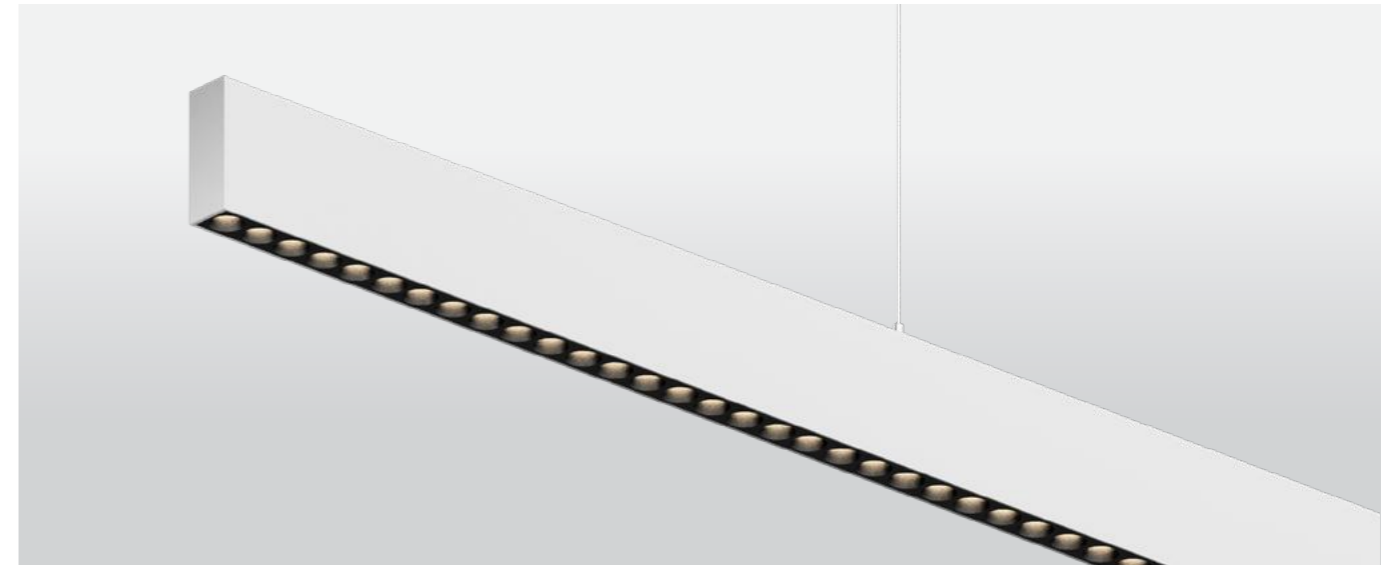

Whether in the room or above the table: due to the unique height adjustment function, it can be adjusted easily and conveniently. Pull and press to flexibly adjust the height distance to meet the needs of different house types and floor heights.

## PHOTOMETRIC

KD935-L

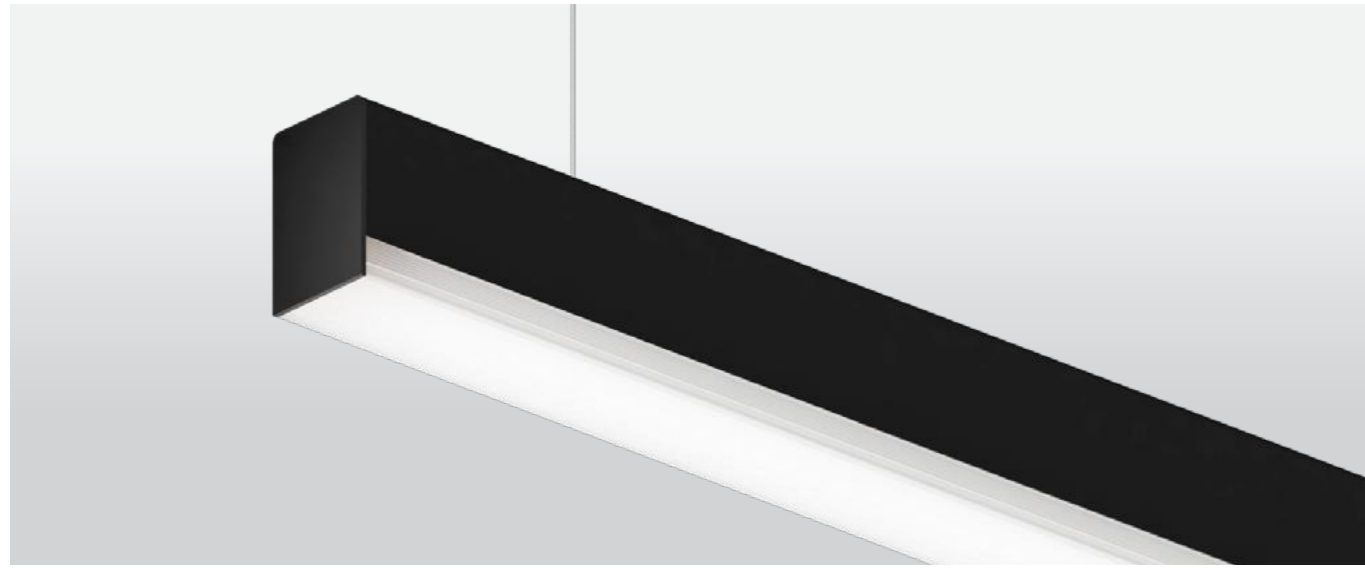

The lamp can achieve upper and lower light emission, which is a combination of double-sided covers (inner diffusion cover + outer stripe cover), and the outer stripe cover is a convex cover, which can achieve light transmission on three sides. According to the demand, a layer of transverse stripe cover can be added (from strip light spot to square light spot)
